

■ Dometic. The Satisfaction Network.

Success based on more than 80 years of experience

Noiseless refrigeration technology is the backbone of our position as the world's leading supplier of hotel miniBars. The 'secret' behind our success is a unique combination of specialist know-how, state-of-the-art technology, pioneering spirit, and innovative design.

Drawing on decades of experience and the continuous feedback from customers all over the world, we have led absorption miniBar technology to perfection. Today, more

than 80 years after the invention of the absorption technology, Dometic miniBars are still leading the way in terms of quality, technology and design. More than 4.5 million units have been sold so far – an unrivalled track record. The Satisfaction Network as it stands today covers almost 100 countries and provides personal customer support on all continents.

Some facts worth knowing about Dometic Hotel Systems

- More than 40 years of experience in the hotel industry
- More than 4.5 million miniBars installed worldwide
- Quality made in Europe
- All Dometic production sites certified to ISO 9001 and ISO 14001
- Global customer support: Dometic companies and business partners in 100 countries
- A comprehensive product range: miniBars for any room design, all kinds of guests, every demand and budget. Plus: hotel safes, professional wine storage cabinets and extended stay hotel equipment
- R&D, manufacturing, quality control, after-sales-service – all out of one hand

“We don’t sell just fridges. We sell added value.”

We see our role not in selling miniBars [and other hotel products] but in providing integrated solutions for professional and profitable in-room marketing. From choosing the right products to competent on-site advice and tailor-made financing solutions – we support investors and hotel managers all the way, in the effort that their investment becomes an immediate success. We can do this because we have everything in-house. Research and development, manufacturing, quality control, customer support – all essential work is performed by Dometic employees, and long-term business partners.

■ Leading in innovations

Dometic – the no.1 miniBar company ... and more

If you don't move forward, you'll fall behind. This applies to our business as well as to yours. Dometic, true to its heritage as the industry's leading innovator, continues to launch new products and design concepts to give your hotel a cutting edge over your competitors. Here is an overview of the most recent Dometic innovations:

- The first ZigBee based wireless automatic miniBar
- The only miniBar featuring Cooling Unit Control [CUC system] for absorption miniBars
- Certified lowest energy consumption for absorption miniBars
- iAudit and webREOS security systems for in-room safes
- Service wine cellar with several temperature zones

■ Dometic Hotel Systems –

Environmentally focused

Dometic miniBars use a natural refrigerant, a solution of water and ammonia. They work noiselessly, so they do not disturb your hotel guests. Made of CFC- and HCFC-free materials, they are unobjectionable even in terms of ozone depletion and global warming potential [ODP/GWP]. Featuring the patented Fuzzy Logic system, they have the certified lowest energy consumption of all absorption miniBars. Dometic miniBar factories are the only ones to have both ISO 9001 and ISO 14001 as well as the EU Eco Audit. Dometic has gone through an EMAS certification scheme and communicates environmental savings by the Dometic Environmental Product Declarations.

Naturally, environmental protection is not only the responsibility of the corporate management. All Dometic employees are committed to reducing the environmental impact

to a minimum – during production and all the way through to recycling. Together with another company Dometic has developed a unique recycling system for absorption miniBars, which is used worldwide.

All Dometic Hotel Systems products fulfil the European Union ROHS directive.

■ Dometic Design Line miniBars

Form and function in perfect harmony

Dometic miniBars are standard in many leading hotels – no matter how high the number of stars. Their unique comfort and technology leave nothing to be desired. The Design Line models have even more to offer: a very enticing appearance. Their modern design pleases the discerning eye and sets your hotel apart from others. Their entirely noiseless operation meets your guests' need for peace and quiet. State-of-the-art technological features such as sensor-controlled cooling units and Fuzzy Logic Energy Control for minimal energy consumption and operating costs place the Dometic Design Line in a class of its own – a class that satisfies exclusive demands.

- **Modern design** – perfect harmony of form and function, design and handling
- **Entirely noiseless operation** – with Dometic absorption technology
- **Sensor-controlled surveillance of the cooling unit** [CUC system]
- **Fuzzy Logic Energy Control** – for the lowest possible energy and operating costs when using absorption-type miniBars
- **Automatic defrost** – minimal maintenance
- **Pace-setting environmental standards** – Dometic miniBars are free of CFCs and HCFCs, all Dometic factories are certified to ISO 9001 and ISO 14001/EMAS
- **Long-term, hassle-free operation** – no need for a maintenance contract, optimum return on investment

Design with a difference: free-standing miniBars with an illuminated unrefrigerated compartment

■ RH 465 LD

65 L wooden cabinet miniBar

Design miniBar on wheels for free-standing use or alternatively to be built in. 65-litre capacity [40 litres refrigerated]. Sensor controlled LED interior light. Fuzzy Logic Energy Control. Automatic defrost. Unique, sensor controlled surveillance of the cooling unit [CUC system]. Comes standard with a "Westphalia" beech trim. Variety of colour available in the case of project orders.
